Introduction

This Standing Operating Procedure (SOP) sets out what staff should do when receiving a request for personal information, such as medical information or staff information, and applies to NHS Shropshire, Telford and Wrekin (NHS STW) for records for which they are the Data Controller (or Data Processor as required). NHS STW are required to provide a procedure to respond to requests made under the Data Protection Act 2018/GDPR. In addition, requests can be made under the Access to Health Records Act 1990.

Under most circumstances these requests will be received and/or processed by the NHS STW Patient Services Team, however, there may be rare occasions when requests will be processed by staff not part of this team. Staff should follow the guidance in this SOP to ensure compliance with current legislation. If staff are unsure, they should contact the Patient Services Team for advice and assistance.

It is important that all staff are familiar with the contents of this SOP as they may be the first point of contact for a request for personal information or they may be required to advise others including patients and other service users who make a request for personal information.

Requests for access to records have strict timeframes therefore it is imperative that any request are dealt with as expediently as possible.

Data Protection Act 1998 and General Data Protection Regulation

Both pieces of legislation give individuals the right, or their authorised representative, the right to apply to access their personal data that an organisation holds about them.

Access to Health Records Act 1990

The Access to Health Records Act 1990 provides a right for authorised people to apply to access information contained within a deceased person's health record.

Who can make the request?

Subject Access Requests – General Data Protection Regulation/Data Protection Act 2018

Subject Access Requests can be made by:

- The individual themselves, the 'data subject'
- Those who have parental responsibility (if requesting a child's record)
- A representative nominated by the individual to act on their behalf such as solicitors or a relative. In these circumstances, valid consent by the individual granting the authority must accompany the application
- In certain situations, a person granted an attorney or agent by the Court of Protection on behalf of an adult who is capable of consent
- The police
- A solicitor acting on behalf of the individual (if the claim is or likely to be against the

Organisation it should be treated no differently), valid documentation granting the authority must accompany the application.

- Via a Court Order

Individual requests should be made in writing or by using the Application for Personal Information form at Appendix B which will ensure the appropriate information is available to process the application.

Requests must also have the appropriate documentation, for example identification documents if necessary, see Appendix M to support the application for access.

Requests made under the Access to Health Records Act 1990 For Deceased Person's Records

Requests made under the Access to Health Records Act 1990 can be requested by:

- The patient's personal representative - a personal representative is the executor or administrator of the deceased person's estate, valid documentation granting the authority must accompany the application.
- Any person who may have a claim arising out of the patient's death, valid documentation granting the authority must accompany the application.

Service Introduction

This process will be facilitated by the Patient Services Team. The team provides a single point of access for the processing of Subject Access Requests and the management of these matters, especially relating to securing appropriate consent documentation.

Where the request is to be sent to

Requests should be made in writing and it is recommended using the Application for Personal Information form at Appendix B and sent with copies of any necessary identification documents, to the NHS STW Patient Services email address:

stw.patientservices@nhs.net

Requests may still be received by post and these should be date stamped on receipt and sent to the Patient Services team either in hardcopy by internal mail. All requests should be made to:

Patient Services Team
Wellington Civic Offices
Larkin Way
Tan Bank
Wellington
Telford
TF1 1LX

If verbal requests for information are received, then the requester should be directed to complete the Application for Personal Information form and return it along with supporting documents to:

stw.patientservices@nhs.net

There may also be requests via social media and direction should be given as above.

Key Roles

The Patient Services Team have specialist knowledge to process requests and are fully versed in the legislation surrounding requests for personal information and to provide assurance that requests are dealt with lawfully and that legislation is not breached.

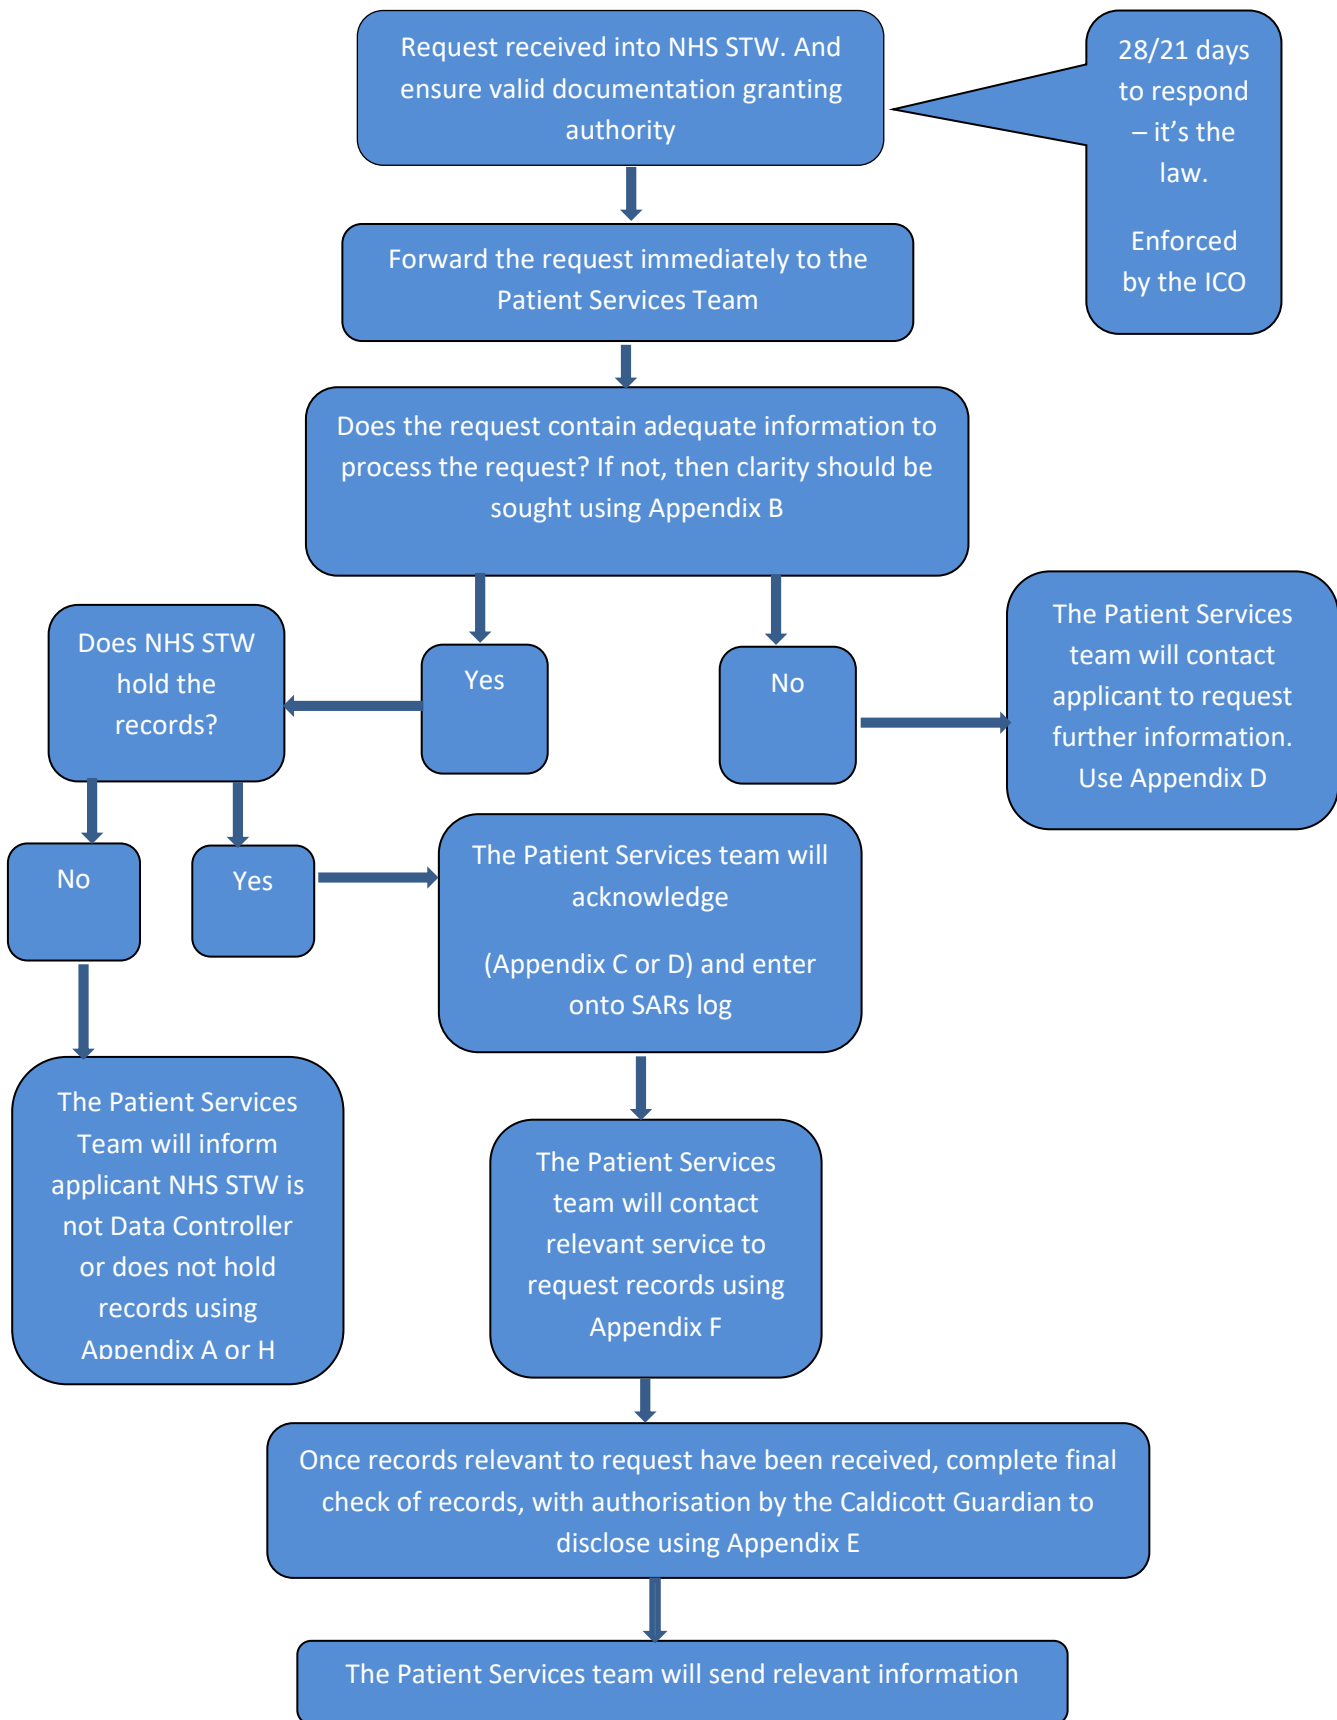

NHS STW's Caldicott Guardian is the Chief Medical Officer and the Data Protection Officer (DPO) is the Midlands and Lancashire CSU Head of Information Governance. The DPO and Caldicott Guardian are responsible for overseeing the subject access request process and providing support, direction and management to the Patient Services Team.

Timescales

Applications made under the new **General Data Protection Regulation/Data Protection Act 2018** must be responded to within **one month (28 calendar days)** unless exceptional circumstances apply in which case the applicant should be informed. Any requests to access personal information received should be directed to the Patient Services team immediately.

Applications made under the **Access to Health Records Act 1990** have a historic ministerial commitment that requests for access to health records should normally be handled within **21 days** where the record has been added to within the last 40 days otherwise a timescale of releasing the information within 40 days is applied.

Process Summary Flow Chart

Other Areas for Consideration

Supervised Access to view Records

Viewing the records is an option but only if both parties agree.

If the viewing is supported, the process of reviewing the data sources and records follows the same process. The records must not be left unattended with the requestor, so the appropriate senior manager must remain in the room to ensure that the records are not tampered with and to explain any entries or terminology or decipher and help with any legibility queries.

On occasions research organisations will request access to the records as part of a research project. Access can only be approved to relevant information with the prior written consent of the person or their personal representative. The appropriate senior manager must be informed, and the records reviewed as per the process above and the information disclosed to the research organisation.

If a person wishes to view their records and then wants to be provided with copies this would still come under the one access request.

Police Requests

Requests where the consent is available may be processed in the same way as solicitors or third-party requests to release notes to the police. The Information Governance Team and/or the Caldicott Guardian should be informed of any requests for records from the police which are not accompanied by the written consent of the data subject. The request from the police must be in writing to comply with the Data Protection Law Enforcement Directive. This is a more extensive data processing right and all requests by the police must comply with this directive.

Original health records must not be given to the police and there will be no charge for copies of records.

Court Order Requests

All court orders and associated documents must be brought to the attention of the Information Governance Team and/or the Caldicott Guardian. Authorisation will be requested from the professional involved and copies of records will be given to the Court. The original records must not be released.

Records not held by the NHS STW

Records held by another organisation contracted to provide services on behalf of NHS STW

There are instances where NHS STW contracts out services to another organisation. In these instances, NHS STW does not hold the records therefore the service that holds those records is responsible for processing the request for records, on behalf of NHS STW. Therefore, NHS STW need to redirect the request to the relevant team and request that they follow their procedure to manage the request on behalf of NHS STW. NHS STW should advise the applicant of this by amending the acknowledgement letter at Appendix C to provide contact details for the team who will be processing the request on behalf of NHS STW and the reasons why they will be doing so.

Records held by another organisation to whom the NHS STW does not contract services

If the request relates to a request for records where NHS STW is not the Data Controller, a letter should be sent to the applicant (see Appendix A) advising NHS STW is not the Data Controller and provide suggestions to where the request should be forwarded to.

Complaints

If the applicant is dissatisfied with the information provided or the manner the request has been handled by NHS STW, they are entitled to complain following NHS STW's complaints procedure.

Monitoring and Audit

As part of our quality control measures and to meet the requirements of the Data Security and Protection Toolkit, audits will be undertaken in respect of both the Subject Access Request processes followed and the logs on an on-going basis. NHS STW and the CSU IG Team will consistently check for accuracy and quality of content and issues arising from the audits will be recorded along with necessary corrective actions and recommendations.

Corrective Action

As a result of the regular monitoring and audits that will be undertaken any areas of concern (including staff not following processes) will be monitored and reviewed within a 1-month period to ensure that the practices meet the desired standard.
